3.4 The maximum number of simultaneously open positions - including pending orders - is thirty...

3.5 Transactions are opened according to the principle Market Execution and, unlike real accounts with guaranteed execution, we can execute transactions on investment accounts on real beingscurrent price (better or worse than the request price).

4. Working hours on the account

4.1 The minimum allowed working time on the account is six months. Only after this period has expired, the trader can proceed to the next step.

4.2 The maximum working time on an account is three years. If during this time the trader

does not proceed to the next step, transactions can be forcibly closed. If the transactions comply with section "3. Requirements for transactions", the profit will be paid to the trader, otherwise the profit will not be paid.

If a trader has made a profit, he has the right to immediately open a new account on a general basis. If a trader has a loss (even in the amount of one cent), then he can open a new account only according to the rules of the second chance.

4.3 If a trader has not made a single transaction on the account within two months, the Company has the right to close score. If there is a profit on it, it will be considered that the account has never been opened. If the account is unprofitable, the trader can open a new account only according to the rules of the Second Chance.

4.4 The account will be forcibly closed if the current funds (not the balance, but the funds) on the account become less than 98000\$ (98% of the initial deposit). Score can be forcibly closed only at the moment when the funds on it are less than the specified level.
